CalSIM Accountable Communities for Health
September 26, 2014 10:00 am – 11:00 am
Webinar Agenda

1. Status Update on State of California's State Innovation Model Testing Grant Proposal

2. Overview of Accountable Communities for Health (ACH) Initiative Design Process

3. Key elements of proposed Accountable Communities for Health

4. Feedback and Input

Request for information

The goals of the webinar are two-fold: to provide information about key components of the potential pilot program, and to solicit information from communities about their current activities. In particular, we are interested in learning about collaborative projects *already in existence* that may relate to potential Accountable Communities for Health. Please find a short Information Gathering Form at the weblink below.

The Form is designed to identify what types of activities are underway that may help inform the further development and design of the Accountable Communities for Health pilot project. This request is not related in any way to the future application process. Word limits for each question are indicated in order to minimize the time and effort needed to fill out the form. You may wish to wait until after the webinar to fill out the form so that you can assess whether the collaborative project you are involved with relates to the ACH pilot program. For example, it should be a collaborative effort that includes the health care sector, public health, community, and other partners.

We greatly appreciate your participation in this effort. Please complete the Form by COB October 10, 2014.

Thank you and we look forward to your participation on the webinar!
