Child Welfare Council Meeting

CWDS-CARES Update

June 13, 2018
Project Purpose

To provide Child Welfare Workers with the tools and capabilities they need to enhance their efficiency and effectiveness at providing for the safety, well-being, and permanency of children and youth who are at risk of abuse, neglect, or exploitation.
Project Approach

• Regular releases of valuable working code into production
  • The CWS-CARES project will provide a new technology platform and suite of digital services to be released incrementally over the next few years.
  • The new digital services are being developed as a collection of web applications, accessible from both computers and mobile devices.
  • The new digital services leverage the principles of Agile frameworks, human/user-centered design, and open source software.
  • The new digital services will provide an intuitive user experience and new capabilities.
  • The new digital services will ultimately replace a number of redundant systems.
Development Principles

• Focus on building the best product
• User-centered design is more valuable than legacy parity
• Adopt a new perspective
• CARES is an independent system that will exchange data with external systems including Court Case Management systems
• Build and deploy iteratively - first release a minimum viable product and then improve on it based on user feedback
2018/19 Project Focus

• Product Strategy
  • Develop the product blueprint ("build plan")
  • Update the Product Roadmap
  • Fully adopt the concept of MVP
  • Develop single DesignOps backlog

• Legacy Data Strategy
  • The CARES data strategy will be informed by the Product Strategy
  • Develop "to be" data model
  • Assume that we will add components to our technical architecture to help stage, transform & consume legacy data
  • Evaluate & plan the scope of data cleanup
Snapshot – search people & history information
The Child Welfare History Snapshot allows you to search CWS/CMS for people and their past history with CWS. To start, search by any combination of name, date of birth, or social security number. Click on a person from the results to add them to the Snapshot, and their basic information and history will automatically appear below. You can add as many people as you like, and when ready, copy the summary of their history. You will need to manually paste it into a document or a field in CWS/CMS.
