Subject: Master Plan for Aging

please add my comments to Master Plan for Aging.

I am a 73 year old woman, active in my very rural community in Lassen county, I am very concerned that the "geography" component of Values/Equity will be ignored in favor of larger metropolitan communities. We who choose to live in rural settings have challenges not faced by urban dwellers, such as transportation in snowy winter and limited shopping and health care. I am requesting that all funds and services be made available to all smaller rural areas on a percentage or other equality distribution basis to ensure that all seniors have a share.

Thank You,
Cathy Maggard
